COTTON STATISTICS AND RELATED DATA
FOR AGRICULTURAL WORKERS

By

Lawrence Myers
Senior Agricultural Economist
and
Maurice R. Cooper
Assistant Agricultural Economist

Washington, D. C.
December, 1932

Agricultural workers have been at a severe disadvantage in dealing with the agricultural outlook for the Southern States and many of the problems of cotton economics because of inadequate statistical information. Cotton statistics are published in apparent abundance, but for the most part they fail to meet analytical requirements, or are so widely scattered as to be actually unavailable for most workers. For several years this Division has been assembling, evaluating, and organizing these statistics. This publication presents many of the major statistical series on cotton and the related problems of demand, price level, and alternative crops, found necessary for understanding world cotton economics and appraising cotton situations.

Data on the supply and distribution of cotton do not balance exactly. Much would be gained by having them balance, but in their present stage much also would be lost by arbitrarily forcing these cotton statistics to balance.

The lack of uniformity in weights of cotton bales is confusing. Current estimates of the United States crop are always given in 500-pound gross weight bales which, for the usual square bale, is taken to equal 478 pounds net weight. The round bale, however, weighs 250 pounds gross or 247 pounds net weight, so for the crop as a whole the 500-pound gross weight bales are equal to slightly more than 478 pounds net. Ginnings figures are available in both running bales and 500-pound gross weight bales. In recent years the running bale has exceeded 500 pounds gross weight by several pounds. As a result, production (or total ginnings) in running bales has been considerably below production in 500-pound gross weight bales. In all cases the American round bale is counted as one-half running bale. In this publication foreign production figures have been converted to 500-pound gross weight, or 478-pound net weight bales. Counting production in 500-pound gross weight bales and consumption and stocks in running bales is one of the sources of discrepancy between supply and distribution figures for American cotton. Wide differences in the weights of running bales for foreign cottons make difficult the comparison between stocks and consumption of the various growths. In this publication consumption and stocks figures have been given in running bales as reported except as noted in a summary table showing world supply and distribution of all cottons. For practical purposes foreign running bales can be adjusted to approximate American bale weights by taking one Egyptian bale equal to 1.5 American bales, one Indian bale equal to .8 American bale and one Sundries bale equal to .72 American bale. Where conversions are made it should be noted that figures on consumption and stocks in China are reported in 500 pound bales.

Linters have been excluded from all figures except where specifically noted.

As noted in the tables, data on alternative crops are preliminary revisions and are subject to subsequent correction. The present figures, however, will probably not be changed materially and are greatly improved over earlier figures.

As it is not planned to re-publish these data in the near future, space has been provided for inserting later figures. Some of these will be published at intervals in World Cotton Prospects or can be obtained from the Division of Statistical and Historical Research, Bureau of Agricultural Economics.

COTTON STATISTICS AND RELATED DATA FOR AGRICULTURAL WORKERS

	<u>Contents</u>	<u>Table</u>	<u>Page</u>
I.	General commodity prices, industrial production and payrolls		
A.	United States wholesale price indexes, monthly		
1.	All commodities, 1798 to 1932	1	1
2.	Farm products, 1797 to 1932	2	2
3.	Commodities other than farm products, 1798 to 1932	3	3
B.	Foreign wholesale price index, monthly, 1924-25 to 1932-33	4	5
C.	Industrial production index, monthly, 1860 to 1932	5	6
D.	Factory Payroll index, monthly, 1919 to 1932	6	6
II.	Cotton prices, grade and staple premiums and discounts		
A.	Spot prices in domestic markets		
1.	New York, monthly, 1816-17 to 1931-32	7	7
2.	Ten markets, daily, 1915-16 to 1931-32	8	10
3.	New England mill points, monthly, 1921-22 to 1931-32		
a.	Egyptian Uppers	10	19
b.	Egyptian Sakellaridis	10	19
c.	American, 1-1/8 inch	10	19
d.	American-Egyptian	10	19
4.	Farm prices of cotton and cottonseed, monthly, 1909-10 to 1931-32	11	20
B.	Spot prices in Liverpool, monthly, 1920-21 to 1931-32		
1.	American middling	12	21
2.	Indian Comra No. 1	12	21
3.	Egyptian Sakellaridis	12	21
4.	Egyptian Uppers	12	21
C.	Grade premiums and discounts, monthly		
1.	Average in ten markets, 1915-16 to 1931-32	13	22
D.	Staple premiums and discounts, monthly		
1.	Discounts at Houston, Galveston and New Orleans, 1924-25 to 1932-33	9	18
2.	Premiums at New Orleans, 1920-21 to 1931-32	14	25
3.	Premiums at Memphis, 1920-21 to 1931-32	15	26
III.	Production, Acreage, Yields and Related Data		
A.	United States		
1.	Production by States, 1866-67 to 1931-32	16	28
2.	Acreage by States, 1890-91 to 1931-32	17	29
3.	Yields by States, 1890-91 to 1931-32	18	30
4.	Ginning to specified dates, 1902-03 to 1932-33	19	31
5.	Production estimates on specified dates, 1915-16 to 1932-33	20	31
6.	State ginnings by farming regions, 1899-1900 to 1931-32	21	32
7.	County groups by farming regions	22	35
8.	State production by staple lengths, 1928-29 to 1931-32	23	37
9.	Yield reductions from all causes by States, 1909-10 to 1931-32	24	38
10.	Yield reductions from boll weevil by States, 1909-10 to 1931-32	25	39
11.	Yield reductions from deficient moisture by States, 1909-10 to 1931-32 ...	25	39
12.	Yield reductions from excessive moisture by States, 1909-10 to 1931-32 ...	25	39
13.	Fertilizer used on cotton by States, 1922-23 to 1931-32		
a.	Acreage fertilized	26	40
b.	Amount used	26	40
c.	Amount used per acre	26	40
d.	Average price per ton	26	40
14.	Fertilizer tag sales by States, monthly, 1920-21 to 1931-32	27	41
B.	World and foreign		
1.	Estimated production, 1891-92 to 1931-32	28	43
2.	Production by countries, 1909-10 to 1931-32	29	44
3.	Production, acreage and yield in India and Egypt, 1895-96 to 1931-32	30	46
4.	Acreage in specified countries, 1921-22 to 1931-32	31	47
5.	Yield in specified countries, 1921-22 to 1931-32	32	47

IV. Cotton consumption, mill activity and textiles

A. Mill consumption in specified localities, by growths, semi-annually, 1920-21 to 1931-32

1. America, Europe, world excluding United States and world	33	48
2. United States, Asia, Great Britain and Japan	33	49
3. Germany, France, Italy and India	33	50
4. China, Russia, Czechoslovakia, and Spain	33	51

B. Mill consumption and related data by countries, monthly

1. United States

a. Consumption-American and all kinds, 1912-13 to 1931-32	34	52
b. Consumption-American-Egyptian and Egyptian, specified years ...	35	53
c. Index of cotton consumption, 1918-19 to 1931-32	36	54
d. Cloth production, sales, etc., 1927-28 to 1931-32	37	54
e. Cloth imports and exports, specified years	38	56

2. United Kingdom

a. Total exports of cotton piece goods, 1900-01 to 1931-32	39	57
b. Exports of piece goods to India, 1919-20 to 1931-32	39	57
c. Exports of piece goods to specified countries, 1878 to 1931 ...	40	58

3. Germany

a. Spinning mill activity, 1925-26 to 1931-32	41	59
b. Weaving mill activity, 1925-26 to 1931-32	41	59
c. Imports of cotton yarn, 1925-26 to 1931-32	42	59
d. Imports of cotton woven material, 1925-26 to 1931-32	42	59

4. France

a. Yarn production, 1920-21 to 1931-32	43	60
b. Yarn stocks, 1920-21 to 1931-32	43	60
c. Yarn orders, 1920-21 to 1931-32	43	60
d. Cloth production, 1920-21 to 1931-32	44	61
e. Cloth stocks, 1920-21 to 1931-32	44	61
f. Cloth orders, 1920-21 to 1931-32	44	61

5. Italy

a. Spinning mill activity, 1927-28 to 1931-32	45	62
b. Weaving mill activity, 1927-28 to 1931-32	45	62

6. Czechoslovakia

a. Yarn exports, 1925-26 to 1931-32	46	62
b. Cloth exports, 1925-26 to 1931-32	46	62

7. Japan

a. Yarn production, 1917-18 to 1931-32	47	63
b. Cloth exports, 1927-28 to 1931-32	47	63

8. Russian cloth production, 1922-23 to 1931-32

48 63

9. India

a. Cotton consumption, 1922-23 to 1931-32	49	64
b. Yarn production, 1919-20 to 1931-32	50	64
c. Imports of cotton piece goods, 1919-20 to 1931-32	51	64

V. Stocks of cotton

A. At mills in specified localities, by growths, semi-annually, 1920-21 to 1931-32

1. America, Europe, world excluding United States and world	52	65
2. United States, Asia, Great Britain, and Japan	52	66
3. Germany, France, Italy and India	52	67
4. China, Russia, Czechoslovakia and Spain	52	68

B. At mills in United States, monthly

1. American, and all kinds, 1912-13 to 1931-32	53	69
2. American-Egyptian, 1919-20 to 1931-32 and Egyptian, 1914-15 to 1931-32	54	70

Contents - Continued

Table Page

C. In public storage and compresses in United States, monthly

1. American, 1913-14 to 1931-32 and all kinds, 1912-13 to 1931-32	55	71
2. American-Egyptian, 1920-21 to 1931-32 and Egyptian, 1914-15 to 1931-32	56	72

D. At specified locations, (carryover) end of July, by growths

1. American in United States, 1907 to 1932	57	73
2. American in world, 1921 to 1932	58	73
3. Indian in world, 1921 to 1932	58	73
4. Egyptian in world, 1921 to 1932	58	74
5. Sundries in world, 1921 to 1932 ..	58	74
6. Summary by growths, 1921 to 1932	59	74

E. Apparent and visible supply data, monthly, 1920-21 to 1931-32

1. Apparent supply of American in United States	60	75
2. Visible supply of American outside United States	60	75
3. World visible of foreign cotton	60	75
4. Stocks of Indian in Bombay	60	75
5. Stocks of Egyptian in Alexandria	60	75

International trade in cotton

A. Exports

1. From the United States, monthly

a. Total to all countries, 1899-1900 to 1931-32	61	76
b. To United Kingdom, 1925-26 to 1931-32	61	76
c. To Germany, 1925-26 to 1931-32	61	77
d. To Japan, 1925-26 to 1931-32	61	77
e. France, 1925-26 to 1931-32	61	77
f. To Italy, 1925-26 to 1931-32	61	77
g. To China, 1925-26 to 1931-32	61	77

2. From United States to specified countries, seasonally 1899-1900 to 1931-32	62	78
---	----	----

3. From India, monthly

a. Total to all countries, 1909-10 to 1931-32	63	78
b. To Japan, 1920-21 to 1931-32	64	79
c. To China, 1920-21 to 1931-32	64	79
d. To Italy, 1920-21 to 1931-32	64	79

4. From India to specified countries, seasonally 1920-21 to 1931-32	65	79
---	----	----

5. From Egypt, monthly

a. Total to all countries, 1909-10 to 1931-32	66	80
b. To United States, 1920-21 to 1931-32	66	80
c. To United Kingdom, 1920-21 to 1931-32	66	80

6. From Egypt to specified countries, seasonally 1920-21 to 1930-31	67	81
---	----	----

7. From Brazil to all countries, monthly, 1920-21 to 1931-32	68	81
--	----	----

8. From Brazil to specified countries, yearly, 1909 to 1931	69	81
---	----	----

9. From China to specified countries, yearly, 1902 to 1930	70	82
--	----	----

10. From Peru to all countries, monthly, 1922-23 to 1931-32	71	82
---	----	----

11. From Peru to specified countries, yearly, 1920 to 1930	72	82
--	----	----

12. From Anglo-Egyptian Sudan, monthly

a. Total to all countries, 1915-16 to 1931-32	73	83
b. To United Kingdom, 1920-21 to 1931-32	73	83

13. From Argentina to all countries, monthly, 1920-21 to 1931-32	74	83
--	----	----

14. From Argentina to specified countries, seasonally 1924-25 to 1931-32	75	83
--	----	----

B. Imports

1. Into United States monthly

a. From all countries, 1898-99 to 1931-32	76	84
b. From Egypt, 1912-13 to 1931-32	76	84
c. From China, 1912-13 to 1931-32	77	85

2. Into United States from specified countries, seasonally, 1914-15 to 1931-32	78	85
--	----	----

3. Into Japan, monthly

a. From all countries, 1911-12 to 1931-32	79	86
b. From India, 1911-12 to 1931-32	79	86
c. From United States, 1911-12 to 1931-32	79	86
d. From China, 1911-12 to 1931-32	79	87
e. From Egypt, 1911-12 to 1931-32	79	87

4. Into United Kingdom, monthly

a. Gross imports from all countries, 1919-20 to 1931-32	80	88
b. Gross imports from United States, 1919-20 to 1931-32	80	88
c. Net imports from all countries, 1919-20 to 1931-32	80	88
d. Net imports from United States, 1919-20 to 1931-32	80	88

VII. Summary tables of supply, distribution and prices

A. United States production, acreage, consumption, exports and prices, 1790-91 to 1931-32	81	89
---	----	----

B. Summary by growths, 1920-21 to 1931-32

1. American and all kinds	82	90
2. Indian	82	90
3. Egyptian	82	90

C. United States production and distribution by staple lengths	83	91
--	----	----

VIII. Income and cost data, United States

A. Income by States

1. From cotton	84	92
2. From cottonseed	85	92

B. Cost of production by yield groups, 1923-24 to 1931-32	86	93
---	----	----

C. Price indexes of cost factors, 1900-01 to 1931-32	87	95
--	----	----

IX. Data on alternative enterprises

A. Crop acreages in specified States

1. Corn, 1890 to 1931	88	96
2. Oats, 1890 to 1931	89	97
3. Wheat, 1890 to 1931	90	98
4. Hay, tame, 1890 to 1931	91	99
5. Hay, wild, 1919 to 1931	92	100
6. Cowpeas, 1924 to 1931	93	100
7. Soybeans, 1924 to 1931	94	100
8. Potatoes, 1890 to 1931	95	101
9. Sweet potatoes, 1890 to 1931	96	102
10. Tobacco, 1890 to 1931	97	103
11. Truck crops, 1928 to 1931	98	103
12. Peanuts, 1924 to 1931	99	103
13. Velvet beans, 1924 to 1931	100	104

B. Ten-year average yields, cotton, corn, wheat, oats, tobacco, and hay in specified States	102	104
---	-----	-----

C. Other enterprises in specified States

1. Milk production per cow, average 1926-1930	101	104
2. Hogs on farms January 1, 1900 to 1932	103	105
3. Cattle on farms January 1, 1900 to 1932	104	106
4. Chickens on farms January 1, 1924 to 1932	105	107
5. Sheep and lambs on farms January 1, 1900 to 1932	106	108

GENERAL COMMODITY PRICES

1935													

Data for 1913-1932, compiled and computed from reports of the Bureau of Labor Statistics. 1926 = 100, converted to 1910-1914 base by multiplying the index by 148.0. (1913-14 average of non-agricultural, 1910-1914 = 100 is 100.95; 1913-14 average of commodities other than farm products and foods, 1926 = 100 is 68.2. Ratio = 148.0).

Table 4.-Index numbers of commodity prices in countries taking about 75 per cent of the United States agricultural exports, by months, 1924-25 to 1932-33

Compiled as follows:

1816-17 to 1870-71, Chronological and Statistical History of Cotton by E. J. Donnell.

August, 1871 to August, 1900, Commercial and Financial Chronicle. Average of daily quotations.

September, 1900 to July, 1932, Market Reports of the New York Cotton Exchange. Average of daily quotations.

Both currency and gold prices are given January, 1862 to December, 1878 while the United States exchange was below par.

Changes in classification are quoted as beginning on the following dates: August, 1816, Upland; October 4, 1822, Middling; October 3, 1825, Upland; September 6, 1842, Fair Upland; September 5, 1843, Fair Upland, Liverpool classification; September 6, 1844, Middling Upland, Liverpool classification; September 8, 1845, Middling Fair to Fair Upland, Liverpool classification; September 5, 1854, Middling Fair Upland, New York classification; September 4, 1855, Middling Upland, New York classification; September 6, 1861, Middling Upland (New York classification omitted).

In regard to these grades or classifications it should be pointed out that prior to about 1874 the grades or classifications used in the cotton trade are said to have not been very definite, although cotton classification is said to have begun in Liverpool in the early 1800's. In the 1870's standards were set up by some of the trade organizations which probably brought more standardization (see R. J. H. De Leach's "History of Cotton Classification" - in Transactions of the Natl. Assn. of Cotton Mfrs., April 24-25, 1918). In U.S.D.A. Farmers Bulletin 591 "The Classification and Grading of Cotton", July, 1914, and in U.S.D.A. Department Circular 278, "The Commercial Classification of American Cotton", January, 1924, it is stated that in the years before the introduction of standards the names used to designate the grade of the cotton had no uniform meaning from market to market or even in the same market at different times. However, in 1874 a committee selected and agreed on a set of standards known as "The Standard American Classification" which was used by the N. Y. Cotton Exchange until October 20, 1914, when it adopted the "Permissive Standards" of the United States which were promulgated by the Secretary of Agriculture in 1909 (see Service and Regulatory Announcements No. 7 of the U. S. D. A.). As to the significance of the several different classifications given by Donnell as the basis of the New York prices we have no definite information. It seems fairly safe to assume, however, that whatever the name given to the grade used as a basis it referred to a grade in which there was considerable trading. It hardly seems likely that the terms "Fair" and "Middling Fair" either according to Liverpool or New York Classifications (as were shown by Donnell) meant anything like the same grade characteristics that similar terms mean today, because of the fact that in all probability very little of such cotton was produced. For instance, the 1930 crop (a crop which had very good weather conditions at harvest time) had no cotton in the 8 or 10 per cent of the crop which was classed, that was as good as Middling Fair and only one-tenth of 1 per cent of the crop was estimated to be as good as Strict Good Middling. Probably the terms used actually referred to a grade which represented a large proportion of the crop just as is the case today. It might be added that for a number of years prior to about August, 1923, the Liverpool Classification for Middling was only a little better in grade characteristics than Strict Low Middling, American Classification and Liverpool Fully Middling was about the same as the American standards for Middling when referring to Upland Cotton. In the earlier years the question of the staple length of "Upland" cotton (which at that time referred only to the cotton grown on the upland of the Southeastern States) was given little consideration and in a general way it is thought that the "Upland" which was quoted was fairly close to 7/8 inch in staple and from that standpoint is reasonably comparable to present day quotations.

1/ Cotton Exchange closed on account of war.

2/ Cotton Exchange opened on November 15. Quotations cover only one-half month.

COTTON PRICES - TEN MARKETS

Compiled from records of the Division of Cotton Marketing.

A - Designates an average for the preceding week.

H - Designates a holiday.

1/ Excluding Norfolk.

2/ Excluding Augusta.

3/ Excluding Norfolk and New Orleans.

4/ Based on the monthly average price at individual markets.

5/ Average for 14 days.

6/ Savannah excluded, Feb. 2 - Feb 28.

7/ Excluding Augusta, Memphis, Little Rock and Dallas.

8/ Excluding Savannah.

9/ Excluding Augusta, Savannah, Memphis and New Orleans.

10/ Excluding Savannah, Houston and New Orleans.

Compiled from records of the Division of Cotton Marketing.

Continued

A-Designates average for preceding week. H-Designates a holiday.

1/ Excluding New Orleans.

5/ Excluding Norfolk and Galveston.

9/ Excluding Savannah and New Orleans.

2/ Excluding Norfolk and Dallas.

6/ Excluding Savannah.

10/ Excluding Norfolk, Little Rock and Dallas.

3/ Excluding Dallas, Houston and Galveston.

7/ Excluding Norfolk and Savannah.

11/ Based on the monthly average price at individual markets.

4/ Excluding Savannah, Galveston and New Orleans.

8/ Excluding Houston and Galveston.

12/ Excluding Norfolk.

COTTON PRICES - TEN MARKETS

Table 8.-Average spot price per pound of American Middling 7/8 inch cotton at 10 designated markets, 1915-16 to 1931-32 - Continued

Compiled from the records of the Division of Cotton Marketing.

Continued

A - Designates an average for the preceding week.

H - Designates a holiday.

1/ - Excluding New Orleans.

2/ - Excluding Dallas, Houston and Galveston.

3/ - Excluding Savannah.

4/ - Excluding Norfolk.

5/ - Excluding New Orleans, Dallas, Houston and Galveston.

6/ - Excluding Norfolk, Houston and Galveston.

7/ - Excluding Norfolk and Savannah.

8/ - Excluding Norfolk, Little Rock, Dallas, Houston and Galveston.

9/ - Based on the monthly average price at individual markets.

10/ - Excluding Savannah and New Orleans.

11/ - Excluding Savannah, New Orleans, Dallas, Houston and Galveston.

12/ - Excluding Norfolk and Dallas.

13/ - Excluding Montgomery.

14/ - Excluding Norfolk, Little Rock, Dallas and Galveston.

COTTON PRICES - TEN MARKETS

Table 8.-Average spot price per pound of American Middling 7/8 inch cotton at 10 designated markets, 1915-16 to 1931-32 - Continued

1934-35													

Compiled from Market Reports of the Liverpool Cotton Association. Average of Friday's prices, except when Friday was a holiday, the prices on the preceding business day were used. Converted from pence to cents at the current rate of exchange.

1/ Prior to August 1924 these prices are for Liverpool Fully Middling which grade was the most nearly comparable to American Middling as quoted in the United States. Since that time the Liverpool Cotton Association has been quoting prices of American cotton on the basis of the Universal Standards. The differences between these prices and those in the 1932 and earlier issues of the U. S. D. A. Yearbooks are accounted for by the use in the Yearbooks of Liverpool Middling instead of Fully Middling for the seasons prior to 1924-25. The minor differences since that time are due to the methods used in computing the averages.

GRADE PREMIUMS AND DISCOUNTS - TEN MARKETS

Table 13.- Average premiums and discounts, in points per pound, for specified grades of cotton, compared with Middling 7/8 inch at 10 spot markets, 1915-16 to 1931-32

1932-33																		
1933-34																		
1934-35																		

Compiled from records of the Division of Crop and Livestock Estimates. Differences from Census ginnings are due to the ginning in one State of cotton grown in another.

United States totals are the sums of the figures before rounding to thousands.

1/ 478 pounds net. 2/ Figures from Bureau of the Census. 3/ Included in "All other States." 4/ Includes Indian Territory. 5/ Less than 500 bales.

ACREAGE - UNITED STATES

Compiled from office records of the Division of Crop and Livestock Estimates.

1/ Includes Indian Territory, 1894-1907.

2/ Includes Kentucky and Kansas.

3/ Includes Kansas, Utah and Kentucky.

4/ Beginning 1918, figures exclude Lower California.

5/ Includes Illinois, Kansas, Kentucky and New Mexico.

6/ Beginning with 1922 only Illinois, Kansas and Kentucky are included in "Other States".

7/ Preliminary.

Compiled from office records of the Division of Crop and Livestock Estimates.

1/ Includes Indian Territory, 1895-1907.

2/ Includes Va., Mo., Okla., Indian Territory, Kentucky and Kansas.

3/ Includes Kansas, Utah, and Kentucky.

4/ Beginning 1918 figures exclude Lower California.

5/ Includes Ill., Kansas, Kentucky, and New Mexico.

6/ Beginning with 1922 only Ill., Kansas and Kentucky are included in "Other States."

7/ Preliminary.

Continued

Compiled from reports of the Bureau of the Census as follows: Cotton ginning Bulletin #2; Cotton Production Bulletins; and Cotton Production and Distribution Bulletins.

1/ It was impossible to obtain the exact amount of cotton ginned from each region during the entire period. In some States new counties have been formed and the Bureau of the Census includes ginnings in the smaller producing counties in an "All other counties" group to avoid disclosures of individual operations. Each region includes those listed in Table 22, where possible.

2/ 478 pounds net.

GINNINGS - TYPE OF FARMING REGIONS

Table 21.-Cotton ginned in specified type of farming regions, by States, 1899-1900 to 1931-32 1/ - Continued

Compiled from reports of the Bureau of the Census as follows: Cotton ginning Bulletin #2; Cotton Production Bulletins; and Cotton Production and Distribution Bulletins.

1/ It was impossible to obtain the exact amount of cotton ginned from each region during the entire period. In some States new counties have been formed and the Bureau of the Census includes ginnings in the smaller producing counties in an "All other counties" group to avoid disclosures of individual operations. Each region includes those listed in Table 22, where possible.
2/ 478 pounds net.

Compiled from Grade and Staple, preliminary reports issued by the Division of Cotton Marketing.

1/ In 1930-31, staple lengths, 1-3/16 inches and over, were grouped together.

2/ Less than 0.1 per cent.

3/ Less than 100 bales.

1934-35														

Compiled from records of the Division of Crop and Livestock Estimates. Based upon reports of correspondents made about February of each year on a general crop damage inquiry in which the correspondents were asked to report the percentage of a normal yield per acre of cotton harvested the preceding year, the percentage of loss in yield, and to distribute the loss to stated causes. The resulting indicated percentages represent the consolidated judgment of the crop reporters and are useful as a rough index of relative losses from the stated causes.

1/ Based on unrounded figures.

2/ No reports.

Compiled from reports of the International Federation of Master Cotton Spinners' and Manufacturers' Association.

Continued

1/ Includes United States, Canada, Mexico, and Brazil.

2/ Figures for half year ended July 31, 1932, and total for season are subject to revision.

3/ Includes Great Britain, Germany, France, Russia, Italy, Czechoslovakia, Belgium, Spain, Poland, Switzerland, Holland, Austria, Sweden, Portugal, Finland, Hungary, Denmark, and Norway.

4/ Includes mill consumption in China, reported in 500-pound bales.

Compiled from reports of the International Federation of Master Cotton Spinners' and Manufacturers' Association except as otherwise stated.

Continued

- Association except as otherwise stated.
- 1/ American cotton data compiled from reports of the Bureau of the Census.
East Indian, Egyptian and Sundries, as published in running bales by the Federation from unpublished data supplied them by the Bureau of the Census.
- 2/ Figures for half year ended July 31, 1932, and total for season are subject to revision.
- 3/ Includes India, Japan and China, except for 1920-21 when there were no comparable figures available for China. Mill consumption in China, reported in 500-pound bales.
- 4/ Comparable data not available.

Compiled from reports of the International Federation of Master Cotton Spinners' and Manufacturers' Association.

1/ These figures agree with those of the Chinese Mill Owners' Association, given in 500-pound bales.

2/ Comparable data not available.

3/ Figures for half year ended July 31, 1932, and total for season are subject to revision.

4/ No returns received by the Federation. Figures are the same as for the preceding 6 months.

5/ No returns received by the Federation. Figures were estimated by the Federation.

CONSUMPTION BY MONTHS - UNITED STATES

Exports by countries compiled from monthly report, Accounts Relating to Trade and Navigation of the United Kingdom. Total exports compiled from Annual Statement of the Trade of the United Kingdom with Foreign Countries and British Possessions, Vol. 1

1/ Stated as Dutch Possessions in India, 1878 to 1901; Dutch East Indies, 1902 to 1931.

2/ Stated as West Coast of Africa (British) 1878 to 1901; British West Africa, 1902 to 1931.

3/ Includes Bombay, Madras, Bengal, Burmah, Straits Settlements and Ceylon. Exports for Burmah 1878 to 1890, not reported.

4/ Includes New Zealand and Australia.

5/ 1894-1904, handkerchiefs and shawls in the piece included in the total; not previously specified and not separately quoted. From

1905 to date flags, handkerchiefs and shawls have been deducted from "total piece goods". Totals include countries not listed.

6/ Australia only.

7/ Exported to ports in territory formerly Turkish but now occupied by other powers, e. g. Crete, Dodecanese, Salonika, etc.

8/ Mesopotamia included in Turkey, 1920.

9/ From preliminary source; flags, handkerchiefs and shawls included in total exports; not separately shown.

MILL ACTIVITY TEXTILE IMPORTS - GERMANY

Compiled from reports of the International Federation of Master Cotton Spinners' and Manufacturers' Associations.

Continued

1/ Includes United States, Canada, Mexico and Brazil. Includes revised estimates of the Bureau of the Census for American cotton in the United States, except for February 1 and August 1, 1932.

2/ Figures for stocks on hand, August 1, 1932, and total for season are subject to revision.

3/ Includes Great Britain, Germany, France, Russia, Italy, Czechoslovakia, Belgium, Spain, Poland, Switzerland, Holland, Austria, Sweden, Portugal, Finland, Hungary, Denmark and Norway.

4/ Comparable data not available.

5/ Includes mill stocks in China reported in 500-pound bales.

Continued

Compiled from reports of the International Federation of Master Cotton Spinners' and Manufacturers' Associations except as otherwise stated.

1/ American compiled from reports of the Bureau of the Census.

East Indian, Egyptian and Sundries as published in running bales by the Federation from unpublished data supplied them by the Bureau of the Census.

2/ Figures for stocks on hand, August 1, 1932, and total for season are subject to revision.

3/ Includes India, Japan and China. Mill stocks in China, reported in 500-pound bales.

4/ No reports for China in 1920-21.

5/ Prior to February 1, 1930, includes Spinners' port warehouse stocks.

6/ Considerable data not available.

Continued

Compiled as follows: Mill stocks - United States, reports of the Bureau of the Census (Revised figures). Outside United States and for India, International Federation of Master Cotton Spinners and Manufacturers Association.

Running bales, except mill stocks in China which are 500 pound bales.

In public storage and elsewhere in the United States, reports of the Bureau of the Census.

At ports and afloat - Great Britain and Continent, Liverpool Cotton Association Weekly Circular. Bombay, Commercial and Financial Chronicle. Japan and China, estimated figures.

1/ Total stocks at these locations include practically all the American cotton carried over. 2/ These stocks do not include cotton in the interior of India, but are used as carryover figures.

Compiled as follows:

Mill stocks - International Federation of Master Cotton Spinners and Manufacturers Association. Running bales except mill stocks in China which are in 500-lb. bales.

At ports and afloat -

Great Britain and Continent; Liverpool Cotton Association Weekly Circular.

Alexandria, Monthly Agriculture and Economic Statistics of Egypt.

United States, Public storage and compresses from reports of the Bureau of the Census, converted to running bales.

1/ Total stocks at these locations include practically all the Egyptian cotton carried over.

2/ These stocks do not constitute a total carryover since they omit stocks in the producing countries other than reported mill stocks, and Chinese port stocks, but they include information regularly available on carryover of Sundries cotton and are used as such.

1934-35													

Compiled from reports of the Commercial and Financial Chronicle, except as otherwise stated. For week ending Friday nearest the first of each month.

1/ Government production estimates, plus carryover at the beginning of the season, minus domestic consumption and exports.

Production, estimates of the Division of Crop and Livestock Estimates, in bales of 473 pounds, net or 500 pounds, gross.

From Aug. to Dec. as of the first of each month. Jan. to Mar. as of the first of Dec. Apr.-July, spring estimates (usually in Mar.) based on preliminary total ginnings, Bureau of the Census.

Carryover, domestic consumption, and exports, in running bales, Bureau of the Census.

EXPORTS - UNITED STATES

Compiled as follows:

Production - 1790-91 to 1898-99 from Cotton Crop of the United States, 1790-11, U. S. Department of Agriculture Circular No. 32.

1899-1900 to 1931-32 from records of the Division of Crop and Livestock Estimates, based on Census ginning data. From 1856-67 to 1898-99 these production estimates do not exactly agree with the totals in Table 16, which shows production by States.

Acreage harvested from records of the Division of Crop and Livestock Estimates.

Consumption and exports from Cotton Production and Distribution, annual reports of the Bureau of the Census. From 1914-15 to 1931-32 consumption is of "all kinds".

Prices - 1792-93 to 1800-01 from Woodbury's Tables and Notes on the Cultivation, Manufacture and Foreign Trade of Cotton, 1836.

1801-02 to 1815-16 is average export price, from Atlas of American Agriculture, Cotton, 1918, by O. E. Beker. 1816-17 to 1931-32 are prices at New York, - see Table 7.

1/ Average for 11 months, no price for October.

2/ New York Exchange closed from August 1 to November 14.

SUMMARY, BY CROPPINGS

Table 82 .- Production, carryover, supply, consumption, exports and price per pound of cotton, by kinds, 1920-21 to 1931-32

Season beginning Aug. 1	American										All kinds									
	Average price 10 spot markets	Exports from the United States	United States production	Carryover, beginning of season		Total supply	Consumption		World production including China	Carryover, beginning of season		Total supply	Consumption

Compiled from data in Tables 8, 12, 28, 30, 33, 34, 56, 57, 58, 62, 65, 67, and 81.

1/ United States production in 478-pound bales, carryover in running bales.

2/ American carryover in running bales, foreign carryover in approximate 478-pound bales. Bureau of the Census.

3/ Stocks at specified locations, Tables 58 and 59, foreign stocks converted from running bales to approximate 478-pound bales. See footnotes 8/ and 10/.

4/ In approximate 478-pound bales except American carryover, in running bales.

5/ Garside's estimate.

6/ Estimate of the Merchants' National Bank of Boston.

7/ Preliminary.

8/ The Indian running bale weighs approximately 400 pounds.

9/ Not available.

10/ The Egyptian running bale weighs approximately 750 pounds.

SUPPLY AND DISAPPEARANCE BY STAPLE LENGTHS - UNITED STATES

Compiled from reports of the Division of Farm Management and Costs. Data based on returns to mail inquiries sent to crop reporters.
 1/ The cost figures include charges for labor of the farmer and his family, and a charge for the use of his land on a cash-rental basis; so that if the cost just equalled the price, the farmer was paid for his time and his investment. The yields on the farms reporting were generally higher than the estimated yields reported by the Division of Crop and Livestock Estimates of the department. This probably means that the farmers who furnished the cost figures are somewhat better than the average and that a relatively small percentage of the cost records are from farmers who grow only small patches of cotton.

INDEX OF COST FACTORS - UNITED STATES

to

COTTON STATISTICS AND RELATED DATA

FOR AGRICULTURAL WORKERS

Revised Estimates of Cotton Production,
Acreage, and Yield, 1866-1931

The Crop Reporting Board of the United States Department of Agriculture has recently completed revised estimates of the acreage and average yield of cotton per acre in the United States and in each State for the years 1866-67 to 1931-32. Some revisions have also been made in the production estimates, although the changes in production since 1899-1900 have been small. The original yield per acre estimates as published prior to May 10, the date on which the revised estimates were released, were based upon the yields as reported by voluntary crop correspondents. These yield estimates and acreage estimates derived from yield and production, were reasonably accurate in reflecting relative changes from year to year, and they also served as a satisfactory basis for forecasting yield per acre and production. These estimates, while serving these purposes, were, however, lower than the yield per acre derived from census data. The revised figures are based on the 1930 Federal Census and other data available during recent years. The objectives in revising the estimates were first to improve the relative accuracy of the data for past years as measures of changes from year to year; and second, to revise toward actual, quantitative yields and acreages when the series were on too high or too low a level.

All future cotton crop reports of the United States Department of Agriculture will be comparable with these revised data and not with estimates published prior to May 10, 1933.

(Paste the following pages over pages 28, 29, and 30)

1933-34																		
1934-35																		

Compiled from records of the Division of Crop and Livestock Estimates. Differences from Census ginnings are due to the ginning in one State of cotton grown in another.

1/ Included in "All other States", 1880-81 to 1888-89 and 1890-91 to 1893-94. 2/ Includes Indian Territory, 1894-95 to 1907-08.

3/ Excludes Cotton from Lower California, Mexico, ginned in California. 4/ Beginning with 1922, only Illinois, Kansas and Kentucky are included in "All other States".

5/ Running bales of all years 1866-67 to 1898-99. 478-pound net weight or 500-pound gross weight bales beginning 1899-1900.

6/ Included in "All other States". 7/ Preliminary.

ACREAGE - UNITED STATES

Table 17.-Acreage of cotton harvested, by States, 1866-67 to 1932-33
